

AquaPaper® : Range of 10 non-woven wallpapers

OUR TIPS TO PRINT & TO CUT :

Edge to edge :

- **with digital cutting :**
printing with an overlap of 2 to 4 mm, then cut this to cover & set at the right dimensions.
- **with manual cutting :**
printing with a 1 cm overlap, then cut the strips in flat superposition (double cut).

For installation with overlapping :

- print with a cover from 1 up to 1.5 cm, placed on the wall and double cut on the wall. These installation tips are valid for all non-woven fabrics.

AquaPaper® ORIGINAL

Whiteness, matt appearance, very good colour rendering are the main characteristics for this range of printable non-woven wallpapers.

AquaPaper® easy to install

is easy to handle, has good tear resistance during installation, easy to cut with a cutter. High dimensional stability, does not retract during drying.

AquaPaper® pre-pasted

with glue on the back side reactivated by spraying water, with a high tack and repositionable during installation.

AquaPaper® washable

can be cleaned with a wet sponge & soapy water.

ORIGINAL FIBRED

Non-woven, matt, fibred, thick

Very covering, masks the imperfections of the wall, simplifying the preparation of the walls.
